## WORK EXPERIENCE

### Amber Horizons

Pune, India

Founder, Website Developer

2019 - 2023

- Established a small Web Design and Development company and worked with over 25 clients from India and all across the globe.
- Designed and developed websites with strong focus on visual appeal, speed and customer success. Worked on Wordpress with tools like Elementor and Woocommerce.
- Worked with various front-end technologies like HTML, CSS and Javascript, while also adding back-end code with PHP.
- Demonstrated ability to deliver end-to-end projects, meet client requirements and help generate revenue for customers.
- Inculcated good leadership and collaborative skills while working with contractors and freelancers.

### Persistent Systems

Pune, India

Trainee, UI/UX Developer

Oct 2017- May 2019

- Developed a UI feature of configuring chart properties of a data visualization application as a member of a 2-person team.
- Using Javascript and Chart.js library, we developed a standard, uniform User Experience that could generate more than 15 types of charts with the relevant data.
- Contributed significantly to fixing bugs of all severities in the application with clean, extensible code.

## CURRENT POSITION

### Pesto Tech

Remote

Student

June 2023 - Present

- Driven by the need to grow and be part of challenging teams and projects, signed up for a 10-month fellowship of full-stack development in the MERN stack.
- Technologies covered are Web Fundamentals (HTML, CSS and Javascript), DSA, React, Node JS and System Design.
- Developed a mini-project in React called IP Tracker which can be found [here](#) along with other projects.
